### **Additional items to include in the submittal package:**

- E) **Site Plan**

Two (2) copies of the Plot Plan.

- F) **Construction Blueprints**

Two (2) copies of Construction Blueprints, Floor Plans, and a complete Cross-Section of the proposed structure.

- G) **2012 Indiana Energy Code Certification**

- 4. SUBMITTING YOUR APPLICATION.** When you submit your application for a building permit, a staff person will follow the checklist above to ensure that you are submitting a complete application. This person WILL NOT do a detailed review of your submittal at this time, but will merely accept your information for review.
- 5. PERMIT APPROVAL/DENIAL.** After review, you will be notified that your submittal was either approved or denied. Procedures for pick up or additional permit submittal will be explained to you. Permit fees are due at time of pick-up.
- 6. DETAILS**
- A) Plot Plan.** A certified plot plan stamped and signed by a land surveyor may be required. The plan must contain the following items, which **cannot be hand-drawn** on the plan:
- Owner's Name and Address. Address of lot.
  - The Indiana registration and professional stamp of the civil engineer or land surveyor certifying the items shown on the plot plan. A written legal description of the subject property.
  - A scale not to exceed 1"-100'. On large acreage parcels, the actual building site should be enlarged.
  - A north point, drawing scale, and the date the plot plan was prepared by a land surveyor or civil engineer.
  - The distance from lot lines for all existing and proposed buildings, structures or improvements (This distance is measured as a line from the point where the building, structure or improvement is closest to the property line. This measurement is taken perpendicular to the property line.)
  - The height of the existing and proposed buildings, structures, improvements.
  - Location and exact dimensions of all existing and proposed structures on the site including sanitary water, sanitary sewer, well with radius, and septic system
  - All existing road rights-of-way, building lines, drainage and utility easements, Boone County legal drains, ditches, federal flood hazard areas, private tile drains, and private lakes or ponds. No building or septic system may be placed closer than 75 feet to a Boone County legal drain without written permission of the Boone County Drainage Board.
  - Location, size, and design of the proposed septic system including a drawing of the absorption field showing the length of absorption trench. Location and size of the proposed sub-surface drainage outlet to the property.
  - Location and size of the proposed sub-surface drainage outlet to the property.
  - Direction of surface drainage flow on the site with at least 5 random elevation points shown at various locations on the parcel or a two-foot topographic contour map of the site.
  - Elevations:
    - Existing elevations at the four corners of the property. In case of large parcels, at the four corners of the building site.
    - Existing and proposed grade elevations at the four corners of the structure.
    - Finished floor elevation of the structure.
    - Invert elevations of the septic system absorption field and the subsurface drainage system.
    - Invert elevation of the septic system absorption field and the substance drainage system.
    - Invert elevation at the proposed sub-surface drainage outlet shall be provided if a field tile is to be utilized. A cross-section showing the top of bank elevation, elevation to the subsurface drainage tile, flow line and ditch bottom elevation if an open drain is to be used as the drainage outlet.
  - Legal description of any easement acquired in order to cross another owners property in order to obtain a drainage outlet. A copy of the document verifying the drainage easement shall also be submitted.
  - The property owner seeking septic system approval may be required to submit soil boring data, soil samples, excavate and underground drainage outlet for inspection, or provide an open excavation for visual inspection by the Boone County Sanitarian.
  - Structure proposed for demolition should be indicate as such.
  - Location and size any proposed or existing driveway. (Any connection to an alley to an alley must also be indicated).
  - The number of dwelling units (if applicable) of existing and proposed buildings or structures.
  - All other information required for the proper administration and enforcement of the Zionsville Zoning Ordinance.

**Definition of Floor Area:**

For Single-family and Two-Family Dwellings, the sum of all horizontal surface areas of all floors of all roofed portion of a building enclosed by and within the surrounding exterior walls or roofs, or the centerline(s) of party walls separating such buildings or portions thereof. The Floor Area of a building shall exclude all areas with a vertical height clearance less than seventy-eight (78) inches, exterior open balconies, and open porches.

**7. CONSTRUCTION BLUEPRINTS**

- Two sets of detailed construction drawings should accompany an ILP application, and should include: At least two elevations for additions, four elevations for single-family and two-family homes; foundation plan, floor plan and a typical wall section, from the roof pitch to the foundation, must be drawn. All cross sections must be properly detailed and labeled. Building materials to be used in the walls must be listed, along with the R-value of each, to ensure compliance with the Indiana Energy Code. If the minimum R-values are not met on the cross-section, an Energy Code Compliance worksheet must be completed.
- Manufactured Trusses.** If manufactured trusses are used, a diagram must be included with building plans for all trusses. Truss diagrams must be stamped with the seal of the registered architect or engineer who is responsible for that design. Only Indiana registrations will be accepted.

**Be Advised:**

The Building Commissioner may waive or relax any of the requirements listed above, as circumstances dictate. Obtaining a permit through The Town of Zionsville does not supersede approval from your Homeowners Association. Please contact you Homeowners Association for approval of your project.
